From Basor Asia Pacific Office

To Working parties with BANPU PCL .

To Whom it may concerns ,

With our meeting with the working engineering and electrical team in BanPU, as well as , with our site inspection at NS Steel. We are here with our full report with reference details as per following

- A) The installation of FRP walkway. We have investigate that your site is completely applicable and able to be installed our FRP walkway system. It would be installed together with our Solar mouting solution.

With your question about the Fire Retardant and Spread, we have the test report from DNV. In the attachment , we have made the explanation on the paper.. The result is cleared that our FRP walkwy is FLAME RETARDANT (= Not a fire fuel during the fire). I also attached our site burning test video to show you how FRP performs themselves under the intent fire .

- B) The Mounting installation, our Mounting is 100% fitted with your metal sheet roof. We have test them at site. It's our S05 model. So this is the right solution ..

Basor Electric SA is one of the top manufacturing of Electrical installation parts and solution, in Valencia Spain. Our factory is located in Spain with no other country. So the customer over the globe could be satisfied with our product quality and service.

We are here in Bangkok, with our Asia Pacific office, you could contact us anytime for any particular issues and questions. We are always here to help you.
